

# WEATHERLOCK® WATERPROOFING UNDERLAYMENT

## HELPING YOU ACHIEVE LEED CERTIFICATION

Owens Corning *WeatherLock* Waterproofing Underlayment products are scientifically engineered to provide the best protection for a variety of roofing needs. As you pursue LEED Certification, rely on the products and expertise of Owens Corning.

LEED certification points are based on the overall building design concept and performance. Owens Corning *WeatherLock* Waterproofing Underlayment products assist in attaining points for the categories listed in Table I. All components referring to a given category must be taken into consideration to assess point compliance.

### Owens Corning *WeatherLock* Underlayment Products

- *WeatherLock* Mat
- *WeatherLock* Metal
- *WeatherLock* G
- *WeatherLock* P

**Table I**

Contribution to LEED Requirement

LEED Credit Category	LEED Requirement	<i>WeatherLock</i> Contribution	Additional Comments
Material & Resource— Local/Regional Materials	1-2 points dependent on 20% of all materials manufactured regionally within 500 mile radius of project.	1 U.S. manufacturing plant helps provide contribution to category points.	Check with local sales representative, and refer to Fig. I, to determine finish material place of origin.

Note: No individual material enables a credit point to be taken within LEED because each category is dependent on the aggregate of all materials and their proportionate relationship to the total dollar cost of all materials.

### Local And Regional Materials

Owens Corning *WeatherLock* underlayments manufacturing location is shown on Fig I. Plotted on the map is an approximate 500-mile radius for this plant. The map enables estimation of building projects that are eligible for the LEED credit regarding regional materials and regionally extracted raw materials. Regional materials are those produced within 500 miles of a building project where the materials will be installed.
