TruDefinition™ DURATION STORM™
Impact-Resistant Shingles with WeatherGuard® Technology

Onyx Black

†
TWO TECHNOLOGICAL BREAKTHROUGHS IN ONE HIGH-PERFORMANCE SHINGLE.

The innovative features of TruDefinition Duration STORM Impact-Resistant Shingles with patented SureNail and WeatherGuard Technologies offer the following:

Breakthrough Design: Featuring a tough, woven engineered reinforcing fabric to deliver consistent fastening during installation.

Triple Layer Protection: A unique "triple layer" of reinforcement occurs when the fabric overlays the common bond of the shingle laminate layers that offers excellent fastener holding power.

Superior Adhesion: Our enhanced Tru-Bond® adhesive grip tightly to the engineered fabric nailing strip on the shingle below.

Excellent Adhesive Power: Specially formulated, wide adhesive bands help keep shingle layers laminated together.

Exceptional Wind Resistance: The industry’s first asphalt roofing shingle engineered to deliver 130-MPH wind warranty performance with only 4 nails, 33% fewer nails are required for maximum warranty protection, which can mean fewer deck penetrations.

Impact Resistance: The integrated polymeric backing feature of our patented WeatherGuard Technology helps achieve one of the industry’s highest ratings.
BEAUTY THAT’S DESIGNED TO WEATHER THE STORM.

TruDefinition® Duration STORM™ Impact-Resistant Shingles with WeatherGuard® Technology are the ideal premium shingle choice for homeowners concerned with the effect of severe weather on their roof.

Unlike standard shingles, TruDefinition Duration STORM™ feature patented WeatherGuard® Technology.
- Integrated polymeric backing material allows the shingles to meet one of the industry’s highest ratings for impact resistance. (UL 2056: Class 4)
- May allow homeowners to qualify for insurance premium discounts§

TruDefinition Duration STORM™ Shingles also utilize SandShield® Technology that provides Triple-Layer Protection™ in the nailing zone and excellent adhesive power. This shingle and corresponding ProEdge STORM™ Impact-Resistant Hip & Ridge Shingles† are designed for maximum holding power against the high winds of severe storms—up to 130 MPH.$

TruDefinition Duration STORM Shingles are specially formulated to provide greater contrast and dimension for any roof.
- Multiple granule colors and shadowing offer a truly unique and dramatic effect
- Available in popular colors with bold, lively contrast and complementing shadow lines for greater dimension
- Limited Lifetime Warranty††
- 130 MPH Wind Resistance Limited Warranty§
- Algae Resistance Limited Warranty†
DURABILITY THAT STANDS UP TO EVERYTHING MOTHER NATURE’S GOT.

First-class protection.

Underwriters Laboratories (UL) has one of the most demanding standards for testing the impact resistance of shingles. The UL 2218 test determines the amount of stress a newly manufactured roofing shingle can withstand without cracking. It also rates the shingle’s performance. TruDefinition Duration STORM Shingles have achieved the highest rating possible—Class 4. Here’s how the testing works:

- Four different-sized steel balls are used to simulate the force of free-falling hailstones
- To test impact resistance, shingles are struck twice in the same spot
- A class rating is assigned to signify resistance to a particular size steel ball. The higher the class rating, the greater the resistance

Tough, yet installs easily.

As well as having a best-in-class rating, DuPont’s Duration STORM Shingles are also easier to install and handle than other UL 2218-rated shingles. Here’s why:

- They resist scuffing and marking during hot-weather installations, unlike rubber-modified shingles
- They will not fuse together in the bundle or on the rooftop during high-temperature conditions
- Algae-resistant granules
- Glass mat
- Reinforcing polymer backing
- Black dust

Available Colors

- Desert Tan
- Brownwood
- Teak
- Driftwood
- Oyster Gray
- Estate Gray
- Onyx Black

Product Attributes
- **Warranty Length**
  - **Limited Lifetime**: 
  - **Wind Resistance Limited Warranty**: 130 MPH
  - **Algae Resistance Limited Warranty**: 10 years

**TruDefinition Duration STORM Shingles**

**ProEdge STORM Hip & Ridge Shingles**

**Product Specifications**
- **Thickness**: 
  - **TruDefinition**: 0.067 in.
  - **ProEdge STORM**: 0.040 in.
- **Exposure per Bundle**: 
  - **TruDefinition**: 12 in.
  - **ProEdge STORM**: 10 in.
- **Shingles per Bundle**: 
  - **TruDefinition**: 36
  - **ProEdge STORM**: 22
- **Pieces per Shingle/Bundle**: 
  - **TruDefinition**: 66
  - **ProEdge STORM**: 3/66
- **Lineal Coverage per Bundle**: 
  - **TruDefinition**: 96 ft.
  - **ProEdge STORM**: 33 ft.

**Applicable Standards and Codes**
- **566 Impact Resistance**: 
  - ASST MRIA Type 7
  - ASST MRIA Type 1

---

Owens Corning strives to accurately reproduce photographs of shingles due to manufacturing variances, the limitations of the printing process, and variations in natural lighting. Actual shingle colors and granule blends may vary from the photo. The pitch of your roof can also impact how a shingle looks on your home. We suggest that you view a roofing display or several shingles to get a better idea of the actual color. Accurately judge your shingle and color choice, we recommend that you view it on an actual roof with a pitch similar to your own roof prior to making your final selection. Color availability subject to change without notice. Ask your professional roofing contractor for samples of colors available in your area.

Preferred Contractors are independent contractors and are neither affiliates nor agents of Owens Corning Roofing & Asphalt, LLC, or its affiliated companies.
THE ESSENTIALS FOR A COMPLETE ROOFING SYSTEM.

It takes more than just shingles to create a high-performance roof. It means a system of products working together. Owens Corning™ Roofing Essentials™ Accessory Products work with our shingles to make up a roofing system that helps provide maximum durability for your roof. And the most protection for your home.

A VentSure® Ventilation Products. Help protect your roof from premature failure by helping remove heat and moisture from the attic.

B PINK® Fiberglass™ Blown-In Insulation. Tiny air pockets trapped in the insulation resist the passage of heat flow.

C Owens Corning™ Hip & Ridge Shingles. Help protect the ridge vent and add an attractive, finished look to roof's hips and ridges.

D Owens Corning™ Shingles. Add durable beauty to a home. Shingles are the first line of defense against the elements.

E Owens Corning™ Underlayment Products. Add an extra layer of protection between the shingles and the roof deck to help prevent damage from wind-driven rain.

F WeatherLock® Self-Sealing Ice & Water Barrier Products. Help guard vulnerable areas where water can enter the roof damage to a roof: eaves, valleys, dormers and skylights.

G Owens Corning™ Starter Shingle Products. The first step in the proper installation of shingles.

H Owens Corning™ Underlayment Ventilation Products. Help prevent moisture build-up in the attic by working with ridge vents to keep air moving.
