

INNOVATIONS FOR LIVING®

ProEdge™ Hip & Ridge Shingles

The cap shingle that offers an edge up on the competition.

When we set out to create a new hip and ridge shingle, we listened to what pro roofing contractors wanted and we delivered. Owens Corning™ ProEdge™ Hip & Ridge Shingles offer contractors a stylish and cost-effective alternative to cutting strip shingles. Capping a roof the right way is now quick, easy and safe.

OUTSTANDING DESIGN: Achieve a clean, consistent, finished look with ProEdge™ Hip & Ridge shingles. It's the right product designed for the job, and the contractor.

PROTECTION: Self-sealing ProEdge™ Hip & Ridge shingles provide exceptional protection for vulnerable ridge lines. The warranty* is concurrent with the Owens Corning™ Roofing shingle installed, including a standalone Class F wind rating, helping assure a long lasting roof.

EASY TO HANDLE: Designed with manufactured perforations and a larger exposure, ProEdge™ Hip & Ridge shingles are easy to separate and install. Pre-cut corners provide attention to detail with no need for cutting on site. The poly-wrapped bundles allow for outside storage and roof-top loading.

VERSATILE: ProEdge™ Hip and Ridge shingles are color formulated to complement a wide range of Owens Corning™ Roofing shingles, including an added shadow line to better enhance the overall aesthetics with laminate shingles.

* See actual warranty for complete details, limitations and requirements.

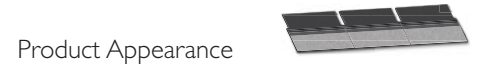

ProEdge™ Hip & Ridge Shingles with Sealant
