

Rapidflow™

Gutter Drainage Protection

Stop spending time cleaning gutters.

NEW!

New Owens Corning RapidFlow™ Gutter Drainage Protection keeps leaves and other debris from clogging your gutters, while allowing water to flow freely.

- **Clog-free**—unique profile and open-celled design promote water flow with no stagnation; product is backed by a five-year “clog-free” warranty*
- **Stays in place**—fits snugly inside the gutter even during extreme weather conditions and withstands winds up to 110 MPH
- **Protects the roof**—allows for improved water runoff as part of a healthy roofing system. Clogged gutters can contribute to ice damming, which can damage shingles and the roof deck
- **Reduces maintenance. Increases safety.** Once installed, it's virtually maintenance-free, and cleaning trips up and down the ladder are few and far between

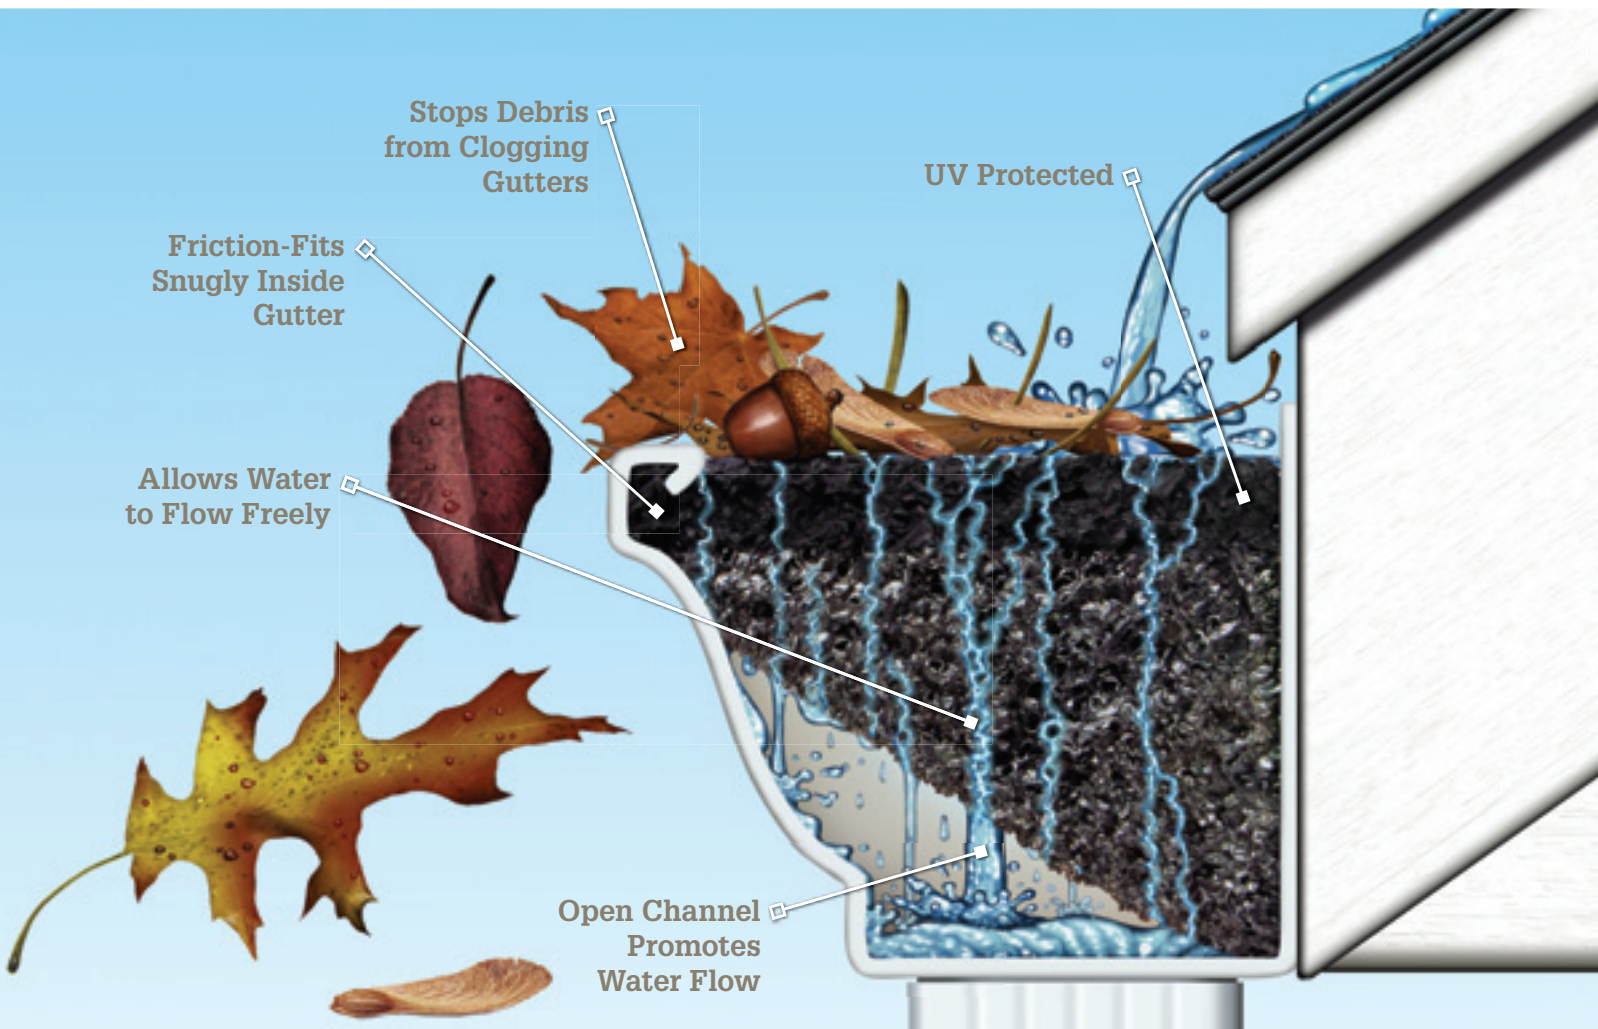

*See actual warranty for complete details, limitations and requirements.

Here's one nasty chore eliminated.

With new *RapidFlow* Gutter Drainage Protection from Owens Corning, you'll spend less time cleaning your gutters. The open-celled poly foam insert prevents leaves and other debris from collecting in your gutters, allowing water to flow freely, resulting in your gutters staying clog-free.

RapidFlow Gutter Drainage Protection nests below the gutter bracket. It's virtually invisible from the curb, so it won't detract from your home's curb appeal. And once installed, it's sure to stay put, for added peace of mind.

RapidFlow™ Gutter Drainage Protection Product Specifications
