

# Illuminator™ Tube Skylight

Bring the beauty of natural light into your home.

- The Owens Corning™ Illuminator™ Tube Skylight is an excellent alternative to traditional skylights
- Great for bedrooms, bathrooms, laundry rooms, hallways, closets and pantries
- Designed to prevent leaking
- Can help reduce reliance on electricity by distributing up to 500 watts of natural light over 300 square feet\*
- Limited Lifetime Warranty† for as long as you own your home

## The essentials for a healthy roofing system.

It takes more than just shingles to create a high-performance roof. It requires a system of products working together. Owens Corning™ Roofing Essentials™ Accessory Products work with our shingles to produce a roofing system that helps provide maximum durability for a new roof, adding comfort, enjoyment and protection for those who live beneath it.

†† 10" models only.

## The Owens Corning™ Illuminator™ Tube Skylight.

### Make any room shine.

Nothing makes a home more inviting than the soft, warm glow of natural light. Unfortunately, many interior rooms, corners and hallways don't have the benefit of windows to bring the outside light in. Now, with the Owens Corning™ Illuminator™ Tube Skylight, you can enjoy the beauty of natural light almost anywhere in your home. The Illuminator™ Tube Skylight can provide up to 500 watts\* of evenly distributed natural light, making it an ideal solution for your bathroom, laundry room or nearly any room you wish to brighten.

### A natural choice over traditional skylights.

The Owens Corning™ Illuminator™ Tube Skylight provides many of the benefits of a traditional skylight, without the associated complications. While both bring natural light in, the Illuminator™ Tube Skylight is designed to prevent leaking and requires a much smaller footprint. It's also ENERGY STAR®\*\* rated to reduce heat gain/loss, while absorbing up to 95% of UV rays, helping to protect your furniture, floors/carpeting and clothing from fading. Plus, with the optional Solar Powered Dimmer,†† you have complete control over how much light you let in, making the Illuminator™ Tube Skylight suitable for nurseries, media rooms, and other areas where you wouldn't consider a traditional skylight. An optional Electric Light Kit is also available, allowing the Illuminator™ Tube Skylight to double as an electric light when natural daylight is unavailable and making it ideal for pantries, closets and hallways.

### A bright addition to your home.

The Illuminator™ Tube Skylight can easily be installed by a professional during new home construction or when replacing an existing roof. Installation typically takes less than two hours and can usually be completed by your roofing installers. Talk to your contractor, as he or she should be able to answer your questions and suggest the best locations for the Illuminator™ Tube Skylight. And you can enjoy a home that's as beautiful on the inside as it is on the outside.
